

March 26, 1999

Dear Dockets Management Representative:

6840 '99 MAR 30 AM 11:14
Please don't turn away from the health risks of BLV, BIV and BSE that are passed on to consumers from suffering "downed" animals. Stop their slaughter by acting on petition 98P-0151/CP1.

Downed animals are very sick (not to mention abusively treated by farm/slaughter industry workers), and defined as "diseased" and common sense says they cannot be allowed to be fed to American consumers. Help STOP this. Not only do all sentient beings deserve our protection, but we deserve protection against law breakers and disease in this civilized country!

Please respond in writing. Thank you,

Kirsten Krivoshia
